

DAY – 02 EXPERIMENTS

1. GREATER:

QUESTIONS 21 / 48 completed

Greater

GREATER

Write a program to read in two integers and use the conditional operator to determine which number is greater.

PROGRAM EDITOR

C++ Run Save

```
1 #include<iostream>
2 using namespace std;
3 int main(){
4     int a,b;
5     cin>>a;
6     cin>>b;
7     if (a>b){
8         cout<<a<<" is Greater Number";
9     }
10    else{
11        cout<<b<<" is Greater Number";
12    }
13 }
```

OUTPUT

```
7 is Greater Number
```

INPUT

```
7
3
```

2. SWAP:

QUESTIONS 21 / 48 completed

Swap

SWAP

Write a program to read in two integers and swap their values using the bitwise XOR operator.

PROGRAM EDITOR

C++ Run Save

```
1 #include<iostream>
2 using namespace std;
3 int main(){
4     int a,b;
5     cin>>a>>endl;
6     cin>>b>>endl;
7     a=a^b;
8     b=a^b;
9     a=a^b;
10    cout<<"After Swapping: "<<endl;
11    cout<<"a = "<<a<<endl;
12    cout<<"b = "<<b<<endl;
13    return 0;
14 }
```

OUTPUT

```
System Error: Could not reach compiler or server error occurred.
```

INPUT

```
7
18
```

3. NEAREST:

QUESTIONS 21 / 48 completed

Nearest

NEAREST

Write a program to read in a floating-point number and round it to the nearest integer using the floor and ceil functions.

PROGRAM EDITOR

C++ Run Save

```
1 #include<iostream>
2 #include<cmath>
3 using namespace std;
4 int main(){
5     float n;
6     int nearest;
7     cin>>n;
8     nearest=(n-floor(n)<0.5)?floor(n):ceil(n);
9     cout<<"Nearest integer "<<n<<" is "<<nearest;
10    return 0;
11 }
```

OUTPUT

Nearest integer 7.18 is 7

INPUT

7.18

4. MAXIMUM NUMBER

QUESTIONS 21 / 48 completed

Max

MAX

Write a program to read in three integers and determine which one is the maximum using the ternary conditional operator.

PROGRAM EDITOR

C++ Run Save

```
1 #include<iostream>
2 using namespace std;
3 int main(){
4     int a,b,c,max;
5     cin>>a;
6     cin>>b;
7     cin>>c;
8     max=(a>b)?((a>c)?a:c):((b>c)?b:c);
9     cout<<"The maximum Number is: "<<max;
10    return 0;
11 }
```

OUTPUT

The maximum Number is: 54

INPUT

48
54
21

5. EQUAL

QUESTIONS 21 / 48 completed

Equal

EQUAL

Write a program to read in two integers and determine if they are equal or not using the ternary conditional operator.

PROGRAM EDITOR

C++

Run Save

```
1 #include<iostream>
2 using namespace std;
3 int main(){
4     int a,b,max;
5     cin>>a;
6     cin>>b;
7     (a>b)?cout<<"Both are Equal":cout<<"Both are Not equal";
8     return 0;
9 }
```

OUTPUT

Both are Not equal

INPUT

56
65
